Full Report

External Data Breaches

101/101

# of employees whose email accounts have been involved with an external data breach
Details

Average Micro Quiz Score

5%

Average micro training quiz grade across all employees

Average Phishing Fail Rate

9%

Average phishing fail rate for all employees. The higher the % the more likely the company will be a phishing attack victim
Details

BREACH PREVENTION SERVICES

Ransomware, malware, viruses, and spam an epidemic for small to midsize businesses and email phishing scams continue to be the attack vector of choice for cybercriminals. However, technology alone *cannot* provide adequate security defense, as employees must be trained to avoid common security threats.

Recent security reports reveal that 95% of data breaches are caused by employee error.
Without proper training to spot and avoid falling victim to phishing attempts, employees will continue be the weakest link in an organizations security defense.

KDC Technologies Breach Prevention Services helps to transform a business' weakest link into their strongest defense.

Key Benefits

Continuous Dark Web Breach Scans
Evaluate potential exposure, and identify breached credentials on the Dark Web that may be putting your business at risk.

Simulated Phishing Campaigns
Perform insightful phishing campaigns to test employee security mindfulness, as well as and roll out engaging security awareness training.

Employee Security Training
Strengthen your first layer of defense by engaging your employees with our security training focused on phishing, ransomware, and business email scams.

Security Policies
Written information security policies that address data security including administrative, physical, and technical safeguards.
