CONTINOUS DARK WEB SCANS

The Dark Web is a part of the internet that isn't indexed by search engines.   Dark Web can be used to purchase stolen information including: credit cards numbers, medical records, banking information, social security numbers, and software that helps criminals break into computers.

Criminals buy credit card numbers, all manner of drugs, guns, counterfeit money, stolen subscription credentials, hacked Netflix accounts and software that helps you break into other people's computers.

Dark Web scans are performed looking for accounts that are associated with your email domain.   Criminals and identity thieves use the Dark Web to buy and sell stolen or hacked information. Account information found on the Dark Web can be used for scams, phishing emails, social engineering scams and identity theft among other uses.

Knowing which email accounts and employee information on the Dark Web will give you the insight needed to protect your company and your employees.

Key Benefits

Continuous Dark Web Breach Scans
Evaluate potential exposure, and identify breached credentials on the dark web that may be putting your business at risk.
